**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to optical ring transmission system for transmitting and receiving of add/drop node identifier, classified in class 398, subclass 83.
  - II. Claims 17-21 drawn to optical ring transmission system for monitoring and recovery of fault transmission lines, classified in class 398, subclass 3.
2. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transmitting and receiving add/drop identifier which would not be used for monitoring and recovery of fault transmission lines as indicated in invention II. Invention II has separate utility such as monitoring and recovery of fault transmission lines which would not be used in transmitting and receiving of add/drop node identifier as indicated in invention I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalzid Singh whose telephone number is (703) 306-5619. The examiner can normally be reached on Mon-Fri 8am - 4pm.
